

British Cathedrals Offer User-Friendly Hearing Assistance via Hearing Loops
(as explained via their own websites)

Bristol Cathedral

If you are deaf or hard of hearing we have a loop system in the main Cathedral, and in the Cathedral's Chapter house. We would recommend sitting nearer the front, as the sound quality is poorer towards the back of the Cathedral.

Canterbury Cathedral

An induction loop system for the hard of hearing is installed in the Cathedral. Hearing aid users should adjust their aid to T.

Chelmsford

If you are a hearing aid user, please turn it to T.

Chichester

A hearing loop system is available in the Cathedral during services.

Coventry

There is hearing loop equipment which is available from the stewards. (That would be devices for hearing aids w/o T-coils)

Derby

For the loop system, turn your hearing aid to T.

Ely

We have a hearing loop systems that cover the Choir, South and North Transepts and the Lady Chapel. These are used at all services.

Gibraltar

We have a loop system for those hard of hearing.

Gloucester

A hearing loop system operates in the Nave and the Quire. If you are attending a service, concert or other event, please switch your hearing aid to "T".

Guildford

Induction loop (not available in the West Gallery)

Hereford

There is a hearing loop available during services, which our Vestry team can advise you further on.

Lichfield

The Cathedral is equipped with induction loops. Hearing aids should be switched to the T position.

Lincoln

Hearing loops are installed at various points in the cathedral, denoted by signage.

Norwich

An induction loop has been installed in the Cathedral; hearing aid users should adjust their aid to T. The loop system covers the Nave, Choir and Transepts.

Oxford

The Cathedral is fitted with a hearing loop. The system is most effective in the centre and away from the pillars.

Peterborough

The Cathedral is equipped with a hearing loop system which is in use during services. Please switch your hearing aid to "T".

Portsmouth

The Cathedral is served by a hearing loop, users should turn their device to the setting marked 'T'

Rochester

An induction loop system is installed in the Cathedral. Hearing aid users should adjust their aid to T.

St. Albans

There is a hearing loop system for services and concerts.

St Edmundsbury

A hearing aid loop system operates in the Cathedral.

St. Paul's

The Cathedral is equipped with a hearing loop system that covers the Cathedral floor and the OBE Chapel in the crypt. The Cathedral has a hearing loop system for services under the Dome and in the Quire.

Salisbury

During services and some concerts, a hearing loop system is available.

Truro

A hearing loop is installed.

Wells

The Cathedral is equipped with a hearing loop system that covers microphones within the Nave and Quire of the main Cathedral floor, which is used at all services for spoken word elements. A portable hearing loop system is also provided for spoken word services within the Lady Chapel.

Winchester

The church is served by a hearing loop. Users should turn their hearing aid to the setting marked T.

Worcester

There is a hearing loop available during services, which our Vestry team can advise you further on.

Durham

There is an induction loop inside the cathedral.

Liverpool

Induction loops in the Conference Rooms, Lady Chapel, Main Space, and Presentation Theatre.

Manchester

The Cathedral has a hearing-loop. Please set your hearing aid to setting T.

Newcastle

Hearing Loop System

This operates in the Nave, including the retail area, as well as the Quire. If you are attending a service, concert or other event, please switch your hearing aid to the 'T' position.

York Minster

Audio induction loops to assist hearing aid users are provided in parts of the interior of the Minster. Minster staff and volunteers have also been trained in welcoming and communicating with deaf and hearing impaired visitors.
